Presentation of playing bridge in PowerPoint without trump

---

Hello,

Considering our two previous emails regarding bridge, where you could see how students at the Faculty of Mathematics and Physics learn bridge as part of elective courses. We also offered you a quiz related to Bridge, and with the help of Visible Bridge on paper, you could learn how to play this mental game. Bridge, like chess, has the status of an Olympic sport.

In today's email, we have prepared a short PowerPoint for you to review how to play this mental game.

Best regards,

Janko Kos
